PCC Rokita SA Phosphorus Business Unit is increasing the prices for Roflam P (TCPP) flame retardant.

Due to prices of yellow phosphorus which raised dramatically during last few months and very high prices of propylene oxide we are forced to increase significantly the price of Roflam P (tris(2-chloro-1-methylethyl) phosphate). We have avoided raising our prices for as long as possible, however under current circumstances we can no longer prolong the inevitable.

To guarantee the continuous supply of high quality product we have to make this decision with immediate effect.
